NIVED KRISHNA S

SOFTWARE ENGINEER | REACT & TYPESCRIPT | MARITIME SOFTWARE

Kerala, India | +91 9497047227 | nived.exe@gmail.com | github.com/nivedexe | Immediate Joiner

PROFESSIONAL SUMMARY

Frontend-focused Software Engineer with 3+ years of experience building enterprise web applications in React, TypeScript and JavaScript, including approximately 3 years on maritime software products. Built 40+ reusable UI components and 50+ modules/screens across five applications, with strength in high-volume data tables, dashboards, reports, charts and timeline views. Experienced in REST API integration, authentication and role-based UI, with working knowledge of Node.js, .NET, SQL and Docker.

TECHNICAL SKILLS

Frontend: React.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Vite, Ionic, Bootstrap

Backend & APIs: REST APIs, API Integration, Node.js (working knowledge), .NET (working knowledge), Authentication, JWT

Database: SQL Server, PostgreSQL, MongoDB, Supabase, MySQL (basic)

UI & Visualization: Responsive UI Development, ECharts, Chart.js, Data Visualization, Figma

Development Tools: Git, GitHub, Bitbucket, Vercel, Docker

Engineering: Role-Based Access Control, Workflow Development, Requirements Documentation, Test Cases, Functional Testing, Agile Delivery, Browser Network/API Debugging

PROFESSIONAL EXPERIENCE

Deltasoft Consulting Private Limited | Software Engineer | April 2023 – Present

- Contributed to 5 enterprise applications across maritime, billing, CRM and architecture domains within development teams of approximately 4–6 members.
- Supported a maritime-focused client for approximately 3 years, contributing to vessel management, certificate management, operational tracking and reporting applications.
- Worked across 50+ application modules/screens, translating functional requirements and business workflows into production-ready React interfaces and application flows.
- Designed and developed 40+ reusable UI components and patterns, including data tables, configurable columns, forms, authentication screens, note editors, buttons and common controls.
- Prepared requirements and workflow documentation and test cases; performed functional, use-case and API payload testing with browser console/network debugging.
- Took part in client demonstrations and requirements clarification, supported teammates with frontend troubleshooting, and worked in Agile cycles from development through testing and release.

SELECTED PROJECT EXPERIENCE

Ship Pro – Maritime Vessel / PMS Application | ~2 years

- Contributed for approximately 2 years to a maritime PMS application covering equipment management, maintenance jobs, job assignment, inventory management, vessel dashboards and operational reporting.
- Designed and implemented a reusable high-volume data table supporting 5,000+ records with advanced and quick search, multi-column sorting, configurable column visibility, locally persisted user preferences, saved filter configurations and bulk job actions.
- Designed and implemented an Outlook-style timeline/calendar view for visualizing scheduled jobs by day and time, providing an alternative view for improved operational visibility.

- Developed complex React workflows across 7+ operational areas, including noon reports, current readings, log entries, onboarding/imported data, custom jobs, maintenance jobs and vessel operations.
- Implemented role-based access and authentication interfaces across multiple maritime modules, supporting user-specific workflows and permission-driven UI behavior.
- Integrated REST APIs across multiple data-driven modules and worked with the .NET-backed application architecture, handling request payloads, responses and frontend data flows.
- Developed a JSON-driven report generation solution that dynamically arranged company-specific headers, footers and content layouts across print and Excel outputs.
- Identified an SVG asset-loading bottleneck in an existing React application and implemented a Babel-based SVG import solution that improved loading performance while maintaining existing application behavior.

Cert Pro – Vessel Certificate Management | ~1 year

- Contributed for approximately 1 year to a vessel certificate management application, developing React interfaces for certificate generation, approval and management workflows.
- Implemented authentication and QR-code scanning functionality across vessel certificate workflows, supporting secure access and certificate verification processes.

Tracker / OBS Application | ~4 months

- Contributed to a React/Ionic operational tracking application for approximately 4 months, implementing scanning/capture workflows and associated data management.
- Developed certificate assignment workflows and mobile-oriented interfaces using Ionic and React.

Billing / CRM Applications | ~6 months

- Contributed for approximately 6 months to billing and CRM applications, developing responsive React/TypeScript interfaces using Vite and Tailwind CSS.
- Translated billing and CRM business requirements into reusable UI workflows and responsive application interfaces.

Architecture / Building Application | ~2 months

- Delivered React-based UI screens for an architecture/building application during a ~2-month project, translating Figma designs into responsive application interfaces.

EDUCATION

Master of Computer Applications (MCA) | Indira Gandhi National Open University (IGNOU) | In progress

Bachelor of Computer Applications (BCA) | Paramekkavu College of Arts and Science | University of Calicut | 2022
